

QDaqPlugin

```
graph BT; FilterFactory --> QDaqPlugin; Interfaces --> QDaqPlugin; PluginFactory --> QDaqPlugin;
```

A UML class diagram showing a class hierarchy. At the top is a box labeled 'QDaqPlugin'. Below it are three boxes: 'FilterFactory' on the left, 'Interfaces' in the center, and 'PluginFactory' on the right. A horizontal line connects the three bottom boxes. From the left end of this line, a vertical line goes up to the bottom of the 'QDaqPlugin' box. From the center of the horizontal line, a vertical line goes up to the bottom of the 'QDaqPlugin' box, ending in an arrowhead. From the right end of the horizontal line, a vertical line goes up to the bottom of the 'QDaqPlugin' box. This indicates that 'QDaqPlugin' inherits from 'FilterFactory', 'Interfaces', and 'PluginFactory'.
